SUMMARY

Experienced Cloud Engineer with track record in designing, implementing, and managing scalable, secure, and highly available cloud infrastructure. Skilled in AWS cloud services, IaC (Terraform), CI/CD automation, monitoring, and cloud security, with extensive experience supporting enterprise applications in fast-paced IT environments.

WORK EXPERIENCE

UD Trucks (Consultant Teksystem) 02/2025 – Present

Cloud Engineer

- Manage AWS accounts, IAM roles, policies, and access permissions following least-privilege and security best practices.
- Support AWS infrastructure and security operations across multiple environments, including vulnerability management and compliance activities.
- Configure and manage AWS security services such as Inspector, Security Hub, and Trusted Advisor to improve the overall security posture.
- Conduct PoCs for new AWS services and technologies, evaluating their feasibility, security, performance, and integration with existing environments.
- Monitor AWS infrastructure and applications using Datadog, metrics, dashboards, and logs, and investigate issues when alerts are triggered.
- Implement cloud cost optimization by reviewing AWS usage and identifying opportunities to reduce unnecessary resources and spending.
- Work with infrastructure, security, and application teams on deployments, troubleshooting, vulnerability remediation, and operational improvements.
- Maintain AWS infrastructure and security documentation and support day-to-day cloud operations.
- Use Terraform and CI/CD pipelines to automate infrastructure and Datadog monitor deployment and management.

TenchoPro Engineering 07/2023 – 02/2025

Cloud Engineer Tokyo, Japan

- Designed and managed highly available AWS environments using VPC, EC2, ALB, Auto Scaling, and NAT Gateway across multiple Availability Zones.
- Built and maintained AWS networking components including VPCs, public/private subnets, route tables, security groups, and NAT Gateways.
- Configured AWS Systems Manager for patch management, maintenance windows, server operations, and compliance reporting.
- Automated AWS infrastructure provisioning using CloudFormation, reducing manual configuration and improving deployment consistency.
- Monitored AWS infrastructure using Datadog, logs, metrics, and alerts, troubleshooting performance issues, outages, and configuration problems.
- Created infrastructure documentation and operational procedures to support ongoing AWS environment management.

NEC corporation India Pvt. Ltd. 05/2022 – 06/2023

Executive Noida

Japan Communication & consulting Services

- Performed incident management, root cause analysis, and troubleshooting for a broad range of AWS services, including compute, storage, networking, databases, and serverless workloads.
- Supported and optimized services such as EC2, S3, VPC, Route 53, RDS, DynamoDB, Lambda, ECS, CloudWatch, CloudFront, WAF, SQS, SNS, and SES.
- Coordinate and provide communication support between the Japan and India teams. Review queries solved by teammates and prepare all the required documents like the review and delivery templates.
- Understanding the client's requirements and ensuring that the end product is of high quality and delivered on time.
- Process tickets and manage contact records with ITOP tool.

Fujitsu consulting India Pvt. Ltd. 07/2019 – 05/2022
Assistant Bilingual Developer Chennai

- Analyzing customer requirements and translating these into technical concepts and specifications.
- Understanding design specification documents And writing Unit Test cases.
- Collecting all the Evidence of PG and PT, and day-to-day communication with Japanese clients.
- Checking the overall quality of code and test cases.
- Used Git as a version control system.

PERSONAL PROJECTS

My portfolio (static website) with CI/CD Automation 12/2025 – Present
Key Features

- Technologies: AWS (S3, CloudFront, Route 53, ACM, WAF), GitHub, GitHub Actions, HTML, CSS, JavaScript.
- Designed and deployed a secure, scalable static website architecture using Amazon S3 and CloudFront for global content delivery.
- Implemented custom domain with HTTPS using Route 53 and AWS Certificate Manager (ACM).
- Integrated AWS WAF to protect against common web vulnerabilities (SQL injection, XSS).
- Built a CI/CD pipeline using GitHub Actions to automate deployment from GitHub to AWS.
- Optimized performance using CloudFront caching and edge delivery.
- Used Git for version control, enabling structured code management and rollback capability.
- Developed responsive frontend using HTML, CSS, and JavaScript.

EDUCATION

Bachelor in Science 06/2014 – 06/2017
Kurukshetra University Haryana

TECHNICAL SKILLS

- Docker
- CI/CD
- AWS Cloud Formation
- Cloud Computing
- EC2
- Cloudtrail
- AWS cloud
- GIT Actions
- Java
- SaaS
- AWS Security
- CodeCommit
- Terraform
- DataDog Monitoring
- Linux
- Team Coordination
- Lambda

LANGUAGES

English

Hindi

Japanese

CERTIFICATES

AWS Certified Solution Architect Professional
AWS 2026-09

HashiCorp certified-Terraform Associate
2025-09

AWS Certified Solution Architect Associate
AWS 2025-04

Japanese Language Proficiency Test Level N2
2023-12

AWS Certified AI Practitioner
AWS 2026-10

Programming Data structure and algorithms using python
2021-02
